

<b>MODEL</b>	<b>T-ONE</b>			
<b>VERSION</b>	<b>MEDI PRO (110 prg + 5 free memories)</b>			
<b>CONTENTS:</b>				
<ul style="list-style-type: none"> <li>• T-ONE MEDI PRO</li> <li>• 4 connection cables (8 electrodes connectables)</li> <li>• User manual and electrodes positions manual</li> <li>• 24 electrodes</li> <li>• 4+4 rechargeable batteries with battery charger</li> <li>• 4 connection cables (8 electrodes connectables)</li> <li>• User manual and electrodes positions manual</li> </ul>				
<b>MAIN FEATURES:</b>				
<ul style="list-style-type: none"> <li>• Four independent channels for the connections of 8 electrodes;</li> <li>• Constant current generator (can guarantee a constant current even when skin condition changes, the device automatically stops in the event of accidental electrodes disconnection);</li> <li>• Compensated biphasic square wave: avoid hazardous thermic effect of polarization;</li> <li>• User feedback: T-ONE recognized patient connection;</li> <li>• Soft-touch easy to use keyboard;</li> <li>• On-line guide on display for fast instructions;</li> <li>• Monophasic generator for ionophoresis programs;</li> <li>• 4 rechargeables batteries AA 1,2 or 1,5 Volt;</li> <li>• Different treatments for man and woman;</li> <li>• Maximum intensity 240 mApp, with 0,5 mA step regulation;</li> <li>• Compliance with 93/42/EEC MDD (medical device CE0476).</li> </ul>				
<b>FREE TENS AND MUSCULAR TREATMENTS MEMORIES</b>				
<p>With T-ONE MEDI PRO you can easily store your own low frequency tens programs (TENS endorphinic) and high frequency tens programs (TENS rapid). It is possible to store specific programs with 1/2/3 seconds slope to stimulate active muscles and also partially denervated muscles.</p> <p>Thanks to its high efficiency microprocessor, T-ONE MEDI PRO enables you to set: program duration, contraction time, contraction frequency, active recovery time, active recovery frequency, up and down slope. All these features are directly available from T-ONE MEDI PRO keyboard, without using any other instruments like personal computer.</p>				
<b>18 Tens Programs</b>	<b>9 Rehab Programs</b>	<b>13 Fitness Programs</b>		
Tens rapid	Ionophoresis 1	Firming up		
Tens endorphinic	Ionophoresis 2	Toning up		
Tens sequential	Athropy prevention	Basic strength		
Tens maximum value	Athropy	Speed		
Tens Burst	Sequential tonic contractions 1	Explosiveness		
Microcurrent	Sequential tonic contractions 2	Endurance		
Vascularization	Stress incontinence	Long effort		
Decontracting	Urgency incontinence	Capillarization		
Inflammatory	Haematomas	Recovery		
Cervical pain		Competitive/Counteractive		
Lumbal pain/Sciatalgy	<b>5 Free Memories</b>	Lipolysis		
Distorsion Contusion			Drain up	
Hand and wrist pain		Memory 1 Tens endorphinc	Microlifting	
Plantar stimulation		Memory 2 Tens rapid		
Epicondylitis		Memory 3 1 second ems slope		
Epitroclea	Memory 4 2 seconds ems slope			
Periarthritis	Memory 5 3 seconds ems slope			
Heaviness in legs				
<b>Dimensions: 76 X 125 X 34 mm</b>
